

CRXT Cookie Policy

This Cookie Policy explains how CRXT LIMITED of 4 Claridge Court, Lower Kings Road, Berkhamsted, Hertfordshire, England, HP4 2AF (“CRXT”; “we”; “us”; “our”), and its affiliates use cookies and similar technologies when you visit our website <https://crex.net> (the "Website or Site"). It explains what these technologies are and why we use them, as well as your rights to control our use of them.

If you have any questions about our use of cookies or other technologies, please email us at dpo@crex.net.

If you do not agree to the practices outlined in this Policy, you must exit the Site.

1.1 What are 'cookies'

The Website uses cookies to distinguish you from other users. They allow us to analyze trends and administer the Website, to help us to provide you with a good experience when you browse the Website and to develop and improve the Website at the same time.

A cookie is a small file of letters and numbers that we store on your browser or the hard drive of your computer if you agree. Cookies contain information that is transferred to your computer's hard drive. A cookie enables the website to remember users that have already visited. Without a cookie, every time you open a new web page, the server where that page is stored will treat you like a completely new visitor. Cookies allow us to remember your custom preferences such as your language preference and allow you to complete tasks without having to re-enter your information when browsing.

Cookies typically contain the name of the website that the cookie came from, the lifetime of the cookie as well as a randomly generated unique number. Websites typically use this number to ensure that you are recognized when you visit the website again, while you move from page to page within one website and that any information you have entered is remembered.

1.2 What information do we collect from cookies

Each time you visit our Website, a cookie is issued to record your visit.

We primarily use the following cookies:

- **Strictly necessary cookies.** These are cookies that are required for the operation of the Website. By way of illustration, these include cookies that enable you to log into secure areas of the Site and make use of its various functions.
- **Analytical or performance cookies.** They allow us to recognize and count the number of visitors and to see how visitors move around the Website when they are using it. This helps us to improve the way the Site works, for example, by ensuring that users are finding what they are looking for easily.
- **Functionality cookies.** These are used to recognize you when you return to the Website and attempt to log-in to your account. This enables us to personalize our content for you, greet you by name and remember your preferences (for example, your choice of language or region).
- **Targeting cookies.** These cookies record your visit to the Website, the pages you have visited and the links you have followed. We will use this information to make the Website and the advertising displayed on it more relevant to your interests.
- **Sessions cookies.** These enable us to record session information, including the data and duration of your visit to the Website, the web pages which you viewed during your visit, your IP Address the type and browser which you used, and your computer's operating system.

We do not use cookies to collect or store any personal information.

The statistical analysis which we obtain from cookies allows us to improve the Website, to generally make your internet experience more enjoyable and to provide a value-added service.

Please note that third parties (including advertising networks and providers of external services like web traffic analysis services) may also use cookies, over which we have no control. These cookies are likely to be analytical and performance cookies or targeting cookies.

1.3 Acceptance and blocking of cookies

You do not have to accept cookies to use our Website.

You can control the use of cookies at the individual browser level, and can even block or reject all or some cookies by activating the relevant setting on your browser. If you do block or reject cookies, you may still be able to access and use the Site, but your ability to use some of its features and areas, together with the services that you connect to through the Site, may be limited or may simply not function properly.

Many browsers also allow you to browse privately, whereby cookies are automatically erased after you visit a site. The following is a list of the most common browsers and the way in which you can activate private browsing when using them:

- Internet Explorer 8 and later versions: **In Private**
- Safari 2 and later versions: **Private Navigation/Browsing**
- Firefox 3.5 and later versions: **Private Navigation/Browsing**
- Google Chrome 10 and later versions: **Incognito**

Further information on cookies can be found on various sites such as www.allaboutcookies.com

In that regard, we also use 'web beacons' or 'action tags' in conjunction with cookies. Web beacons are typically a minute and transparent graphic image that is placed on a website or in an email. Web beacons allow the website to record the simple actions of the user opening the page that contains the web beacon.

Since web beacons are the same as any other content on a web page, you cannot opt out or refuse them, however, these can be rendered ineffective by changing your browser's cookie settings to refuse cookies.

• **Social Media Features and Widgets**

The Site includes social media features. These features may collect your IP address, which pages you are visiting on the Site, and may set a cookie to enable this feature to function properly.

Any personal information that you provide via such social media applications may be collected and used by other members of that social media application and such interactions are governed by the privacy policies of the companies that provide the application. We do not have control over, or responsibility for, those companies or their

use of your information.

2. Other Information Stored

Webserver Logs

For security and troubleshooting purposes our webserver stores logs of activity on the website. The information stored includes: date, time, IP, page visited, result, amount of data sent and browser used.
